AZIENDA COMPANY

Battistella B. G. S.r.l. ha alle spalle più di quarant'anni di esperienza, che hanno permesso di far conoscere il proprio marchio in tutto il mondo. Da anni si progettano e vendono macchine per lo stiro ad uso semi-professionale e industriale. Oramai è rimasto ben poco della piccola azienda che trent'anni fa produceva caldaiette e tavoli destinati al mercato locale. Attualmente la ditta Battistella dispone di oltre settanta modelli di tavoli, generatori di vapore, smacchiatrici, toppe, manichini e presse. Ciò che da sempre caratterizza il marchio BG e che ne ha resa possibile la diffusione sono la qualità, la funzionalità e il rispetto per le normative in materia di sicurezza. Una distribuzione della merce in tempi brevi è inoltre resa possibile grazie all'ampio magazzino, provvisto di una vasta gamma di prodotti e ricambi in pronta consegna. Nel progettare nuovi modelli, l'ufficio tecnico mira alla creazione di macchine che si caratterizzano per il basso consumo e l'alta resa; tra queste ricordiamo i generatori di vapore a gestione elettronica e i manichini pneumatici, studiati appositamente per i clienti che richiedono una stiratura veloce e di alto livello. Facendo tesoro delle richieste di una clientela sempre più vasta ed esigente, si lavora di continuo sulla realizzazione di prodotti innovativi, nonché sulla revisione e ottimizzazione di quelli già esistenti. E sono proprio lo spirito di innovazione e la continua ricerca tecnologica che fanno della ditta Battistella una realtà dinamica e in continua crescita. Grazie a questo desiderio di rinnovamento sono state realizzate anche macchine sterilizzatrici e pulitrici destinate ai settori dentistico e orafa. L'intera gamma di prodotti è a disposizione nello show-room in via Bessica a Rossano Veneto.

Thanks to over forty years of experience, Battistella company has spread its brand all over the world. We have been designing and selling semi-professional and industrial ironing equipment for years. Nowadays, we manufacture over seventy models of ironing boards, steam generators, spotting tables, toppers, dummies and ironing presses.

The BG brand has always stood out for quality, functionality, and respect for safety regulations. In addition, thanks to our large warehouse, we can provide machines quickly. In designing new models, our technical department aims at creating machines specially designed for those customers who require high standards in finishing and high productivity, and guaranteeing minimum consumption and maximum performance. We are constantly developing innovative models and improving and optimizing existing products, in order to meet our customers' requirements. And it is precisely the spirit of innovation and ongoing technological research that led us to produce sterilizing and polishing machines for dental and goldsmith sectors. Visit our showroom in Rossano Veneto to see the entire range of Battistella products.

GIOVE'S ACCESSORIES

ATLANTIDE 80

OZONE GENERATOR

4

Technical features

ATLANTIDE 80

Dimensions	26 cm x 25 cm x 28 cm
Weight	3,8 kg
Electrical consumption	35 w
Voltage	220 V – single phase
Recommended cubic meters	80 m ³
Programs	Timer adjustable from 0 to 60 minutes

Ozone generator for the sanitizing of rooms up to 80 cubic meters.

Completely in stainless steel, 100% made in Italy.

ATLANTIDE 160

OZONE GENERATOR

5

Technical features

ATLANTIDE 160

Dimensions	26 cm x 25 cm x 28 cm
Weight	3,9 kg
Electrical consumption	45 w
Voltage	220 V – single phase
Recommended cubic meters	160 m ³
Programs	Timer adjustable from 0 to 60 minutes

Ozone generator for the sanitizing of rooms up to 160 cubic meters.

Completely in stainless steel, 100% made in Italy.

ATLANTIDE 500

OZONE GENERATOR

6

Technical features

ATLANTIDE 500

Dimensions	26 cm 74 cm x 55 cm
Weight	19,5 kg
Electrical consumption	250 w
Power supply	220 V – single phase
Recommended cubic meters	500 m ³
Programs	3 cycles of 60 – 90 – 120 minutes
Ozone abatement	Activated carbon filter

Ozone generator for the sanitizing of rooms up to 500 cubic meters complete with wheels. Machine complete with activated carbon filter to reduce the ozone level at the end of each cycle. Completely in stainless steel, 100% made in Italy.

ATLANTIDE 1000

OZONE GENERATOR

Technical features

ATLANTIDE 1000

Dimensions	26 cm x 74 cm x 55 cm
Weight	20kg
Electrical consumption	320 w
Power supply	220 V – single phase
Recommended cubic meters	1000 m3
Programs	3 cycles of 60 – 90 – 120 minutes
Ozone abatement	Activated carbon filter

Ozone generator for the sanitizing of rooms up to 1000 cubic meters complete with wheels. Machine complete with activated carbon filter to reduce the ozone level at the end of each cycle. Completely in stainless steel, 100% made in Italy.

GEA

OZONE SANITIZING CABINET

8

Technical features	GEA
Blowing motor power	73w
Ozone lamp power	70 w
UVC lamp power	70 w
Total power	143 w
Packing	1,25mt ³
Overall dimensions	80 × 60,5 × 184 H cm
Weight	110 kg
Standard voltage	230 V – 50 Hz
Upon request	120 V – 60 Hz

Safety block for door opening. Total cycle counter. Long lasting and high efficiency lamps which ensure constant sanitizing. No active carbon filter. Small display for the visualization of the machine's status. Possibility to choose three work programs with pre-set timing. Shelves adjustable in height.

Acoustic and visual warning of end cycle. Lamp breakdown warning.

MINI GEA

OZONE SANITIZING CABINET

Technical features

MINI GEA

Blowing motor power	73w
Ozone lamp power	70 w
UVC lamp power	70 w
Total power	143 w
Packing	1,25mt ³
Overall dimensions	80 × 60 × 125 H cm
Weight	110 kg
Standard voltage	230 V – 50 Hz
Upon request	120 V – 60 Hz

Safety block for door opening. Total cycle counter. Long lasting and high efficiency lamps which ensure constant sanitizing. No active carbon filter. Small display for the visualization of the machine's status. Possibility to choose three work programs with pre-set timing. Shelves adjustable in height.

Acoustic and visual warning of end cycle. Lamp breakdown warning.

GIOVE

STEAM GENERATOR FOR SPECIAL USE TO SANITIZE

10

Technical features	GIOVE
Steam autonomy	4 hours
Boiler power	1450 w
Pump power	48 w
Total power	1498 w
Tank	10 L
Net capacity	3,4 L (Inox)
Steam pressure	4 bar
Dimensions	25×47×89 H cm
Weight	15,5 kg
Voltage	230 V / 50Hz

With 4.5 litre stainless steel boiler, pressure 4.5 bar, Alcoholic mix system with steam, tank for liquid (alcohol or germicidal liquid) of 10 litres, possibility to use the machine with steam only at 4.5 bar or by selecting a button a steam mix high temperature

and alcohol at 4.5 bar to sanitize clothing and surfaces in general.
